Staining

Enduracrete®'s staining process transforms an ordinary concrete area into a dramatic flooring that can emulate just about any look you can imagine. Picture the beautiful Italian Marble or gazed stone on your surface area.

Enduracrete creates the appearance of high end expensive flooring at a fraction of the cost. Our staining process bonds with your concrete's minerals, giving it the appearance and feel of a natural stone surface.

Each concrete area accepts stain in varying degrees of intensity which will produce magnificent multi-hued variations.

Your surface need not be limited to a single standard color. Your bland concrete floor is now your canvas. Be creative or utilize standard designs.

When it's all done your concrete floor will be more than a flat surface to walk on. It will reduce your building maintenance costs, add beauty and valued accents to your property

Polishing & Coating

Polished concrete provides protection and durability to flooring. This process reduces maintenance costs by reducing dusting and eliminating the need for waxes and coatings of any kind.

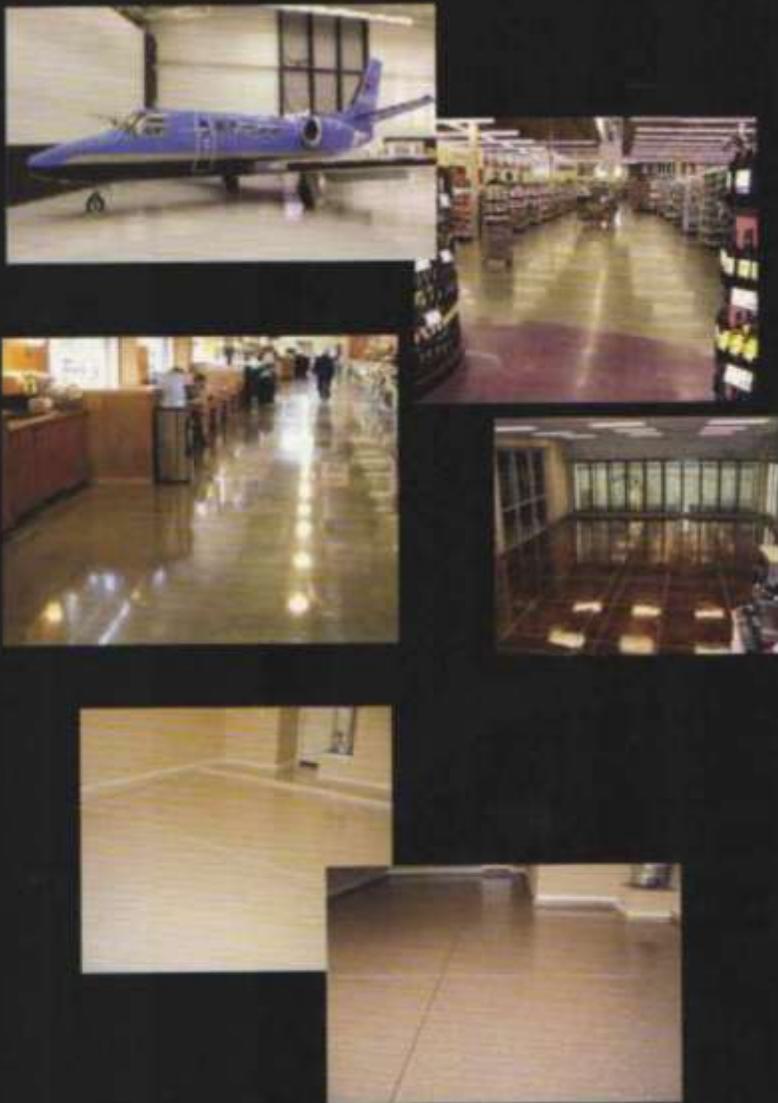

Enduracrete® certified technicians mechanically polish surface to a dust-proof, low, medium or high gloss finish.

As the lowest care cost flooring option polished concrete is the logical choice for:

- Auto Dealerships
- Garages & Fire Stations
- Industrial
- Museums & Galleries
- Office Buildings
- Residents
- Restaurants
- Retail Stores
- Schools & Universities
- Showrooms
- Warehouses

Enduracrete can create seamless floors in hundreds of colors and designs.

The resulting surface is chemical and impact resistant, easy to clean and installed with little down time.

Repairing

Every job begins with an assessment of the floor, and what repairs are needed to insure a seamless statement of quality. Nothing is so distracting as an unsightly chip, crack or blemish. If we are to convert your floor into a reflection of your quality, this is the first step.

An understanding of each surface type whether concrete, concrete terrazzo, epoxy terrazzo, or natural stone requires different techniques to repair and clean without damaging the surface. What has been traditionally referred to as an art, is now a science with techniques defined to assess what stones, what sizes, what ratios and what matrix colors are needed to repair chips and cracks so they blend back into the floor without distracting from your intended appearance.

When it's all done we have a stable canvas on which.

About Us

Ed Williams, CEO Marblelife, Inc.

“Supported by more than 100 craftsmen throughout North America we provides beautiful concrete results tailored to your building’s needs.

Our solutions don’t just look good, they last, they work, and they add value in lower maintenance costs, enhanced tenant pleasure, and beauty. ”

Enduracrete is a wholly owned division of MARBLELIFE.

MARBLEIFE has been developing solutions for the stone, concrete and tile and grout markets since 1983. Today, Marblelife is the largest company of its kind. This does not happen by accident, but by focusing on developing services designed to address root cause problems versus the observable symptoms, and delivering via people that are committed, trained and enthusiastic. This results in solutions that are not just beautiful, but long-term durable, and of a quality that we are prepared to put our names on.

Marblelife is also the only service provider to manufacture its own retail care products, based on more than 20 years of field experience. Our craftsmen utilize our products, testing them every day, so we know they work.

Whether polishing concrete on installation; retrofitting an existing industrial floor as a stained, decorated, beautiful entry way; restoring terrazzo cracks, or simply providing the lowest coat maintenance floor service, Enduracrete can customize a plan for your situation, need and building.

Looking for someone that can value to your project? Marblelife has developed unique solutions for marble, granite, ceramic, porcelain surfaces that range from aiding the medical community in managing secondary infection, to the local homeowner rid themselves of stained grout permanently.

Take a look inside at what can be done with concrete these days, then give us a call. We look forward to meeting your needs.
