IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy

STORAGE:..... Store locked up.

DISPOSAL: ..... Dispose of container and contents in accordance with

to do – continue rinsing.

local regulations.

# 3 - COMPOSITION / INFORMATION ON INGREDIENTS

INGREDIENT
Sodium Metasilicate Pentahydrate
Sodium Carbonate
Trisodium Phosphate
Sodium Nitrite
Sodium Tripolyphosphate

C.A.S. NUMBER
6834-92-0
497-19-8
10101-89-0
7632-00-0
7758-29-4

Percentages of ingredients are being withheld as trade secret information. This information will be disclosed as necessary to authorized individuals

## 4 - FIRST-AID EASURES

BREATHING (INHALATION): ... If victim shows signs of discomfort or irritation, remove to

fresh air. If symptoms persist, get immediate medical

attention.

## 14 - TRANSPORTATION INFORMATION

PROPER SHIPPING NAME:..... Disodium Trioxosilicate Mixture

**HAZARD CLASS**:..... 8

UN/NA NUMBER: ...... UN 3253

PACKAGING GROUP :.....III

## **15 - REGULATIONS**

Contents of this MSDS comply with the OSHA Hazard Communication Standard 29CFR 1910.1200

## 16 - OTHER INFORMATION

ADDITIONAL:...... The information contained in this SDS is based on the data available to

us from sources we believe to be reliable. No warranty or guaranty expressed or implied is made regarding the accuracy of this data or the results obtained from the reliance on this data. The manufacturer assumes no responsibility for injury from the use of this product. Be safe- read this product safety information and pass it on to all persons who may be exposed to this product. Federal law requires it. This product and/or all of its components are either included on or exempt from the TSCA Inventory of Chemical Substances.

NFPA Hazard codes:

Health: 1 Fire: 0 Reactivity: 0 Special:

HMIS III rating:

Health: 1 Flammability: 0 Physical hazard: 1

NFPA and HMIS use a numbering scale ranging from 0 to 4 to indicate the degree of hazard. A value of zero means that the substance possesses essentially no hazard; a rating of for indicates extreme danger. Although similar, the two rating systems are intended for different purposes, and use different criteria. The NFPA system was developed to provide an on-the-spot alert to the hazards of a material, and their severity, to emergency responders. The HMIS system was designed to communicate workplace hazard information to employees who handle hazardous chemicals.
